## RELEASE NOTES

Version 2.0 of the LIRF Roma Fiumicino Leonardo da Vinci Airport scenery for X-Plane is a completely new designed and improved airport scenery with respect to the previous v1.5b.

### Version 2.0 - 29 May 2013

This version features:

- Updated layout of the airport based on latest available aerodrome charts and orthophotos. All taxiways, airport terminals are now (almost) in their exact position.
- Updated taxiways (fixed taxiways layouts) and added new taxiways on apron east side.
- Updated taxiway edge and centerline lines and lights reflecting actual airport. Fixed taxiway edge lines/lights exact positioning. Changed taxiway width as in real airport.
- Updated vertical taxiway signs.
- Updated horizontal "rwy ahead" and "no entry" signs.
- Added horizontal taxiway signs matching real counterpart **(new)**.
- Added real parking positions including new parking areas on east side of apron **(new)**.
- Added parking positions horizontal signs **(new)**.
- Added apron roads with some signs **(new)**.
- Added more static aircrafts **(new)**.
- Added several static ground airport objects e.g. baggage carts, refueling truck, stairs etc **(new)**.
- Fixed wrong runway lighting for RWY25.

This version also includes (already in v1.5b):

- Runway centerline lights.
- Taxiway centerline lights.
- Runway rapid exit lights.
- Correct approach lights (CALVERT).
- Apron lights (for HDR)

Please check for the latest updates at:

<http://lirf2013xp.weebly.com/>

## COMPATIBILITY AND KNOWN ISSUES

The scenery has been tested on X-Plane 10.21 32bit and 64bit.

### General Issues:

- Being the scenery objects adapted from the Rome Fiumicino ISD scenery for FSX, it was not possible to move some of the objects in their correct position as some objects are linked to each other.

### Known bugs

- *(T3-Old International terminal roof transparent)* T3 lower roof was removed hence it may be possible to look through it although only from the ground.
- *(Floating lights at pier A and B)*. Some floating lights can be seen at night over the pier A and B gates.

## SPECIAL THANKS

Special Thanks goes to:

- **Wehrlipub** for the original ISD conversion work.
- **Alessandro Savarese & Alessandro Simonato** of the **ISD project** for their original work on LIRF Rome Fiumicino Airport on MS Flight Simulator 2004.
- **Jürgen Schäble** for the apron lights effect adapted from his original work on EDDM - Airport Munich Franz-Josef-Strauß.

## DONATIONS

If you wish to thank for the work and contribute, you may do so with a free donation at the below link:
